THE ULTIMATE IN DURABILITY

At long last, the innovative piping systems that changed the way the world supplies water are coming to America. POLOPLAST's five-layer, ductile polypropylene (PP-R) pipes and fittings ensure corrosion-resistant, hygienically pure water delivery systems that last decades longer than the competition. POLOPLAST pipes are lighter, stronger, and easier to install than traditional pipe systems. We're so sure of our quality that we offer a 10-year warranty on every product that we sell. The warranty even extends beyond the product, including incidental damage and replacement costs.

Contact POLOPLAST America today for technical specifications and a consultation on your next building project.

WHY ENGINEERS LOVE POLOPLAST

IT'S FASTER TO INSTALL

Fusion technology and the modularity of prefabrication makes installation times disruptively fast.

IT'S EASIER TO INSTALL

Heat-fused joints and an average weight 80% lighter than steel reduces strain and requires less equipment.

IT LASTS LONGER

Purpose-engineered polypropylene delivers performance for decades after other materials fail.

IT'S MORE AFFORDABLE

Superior materials and design cause construction and operation costs to drop significantly.

IT'S NATURALLY INSULATED

The natural properties of polypropylene insulate our pipes from sound and heat transfer.

IT'S VIRTUALLY LEAK-FREE

Decades of research result in the industry's most reliable pipes and heat-fusion joints.

IT'S ECO-FRIENDLY

Our innovative PP-R piping system keeps water pure, contains no toxins or BPAs, and is 100% recyclable.

IT SUPPORTS SUSTAINABILITY

Our PP-R piping is corrosion- and scale-resistant, creating a lifetime of greater energy efficiency.

POLOPLAST MECHANICAL

POLOPLAST is a world leader in supplying innovative polypropylene (PP-R) pipe systems specifically designed and developed for cooling, air-conditioning, and other mechanical applications. Thanks to the extra-durable material properties of our products, POLOPLAST resides at the leading edge of piping innovation. Our PP-R pipe system not only improves the quality of life and work environment for the people in the building, it also improves your workflow during the installation.

POLOPLAST UV

POLOPLAST knows that pipes exposed to outdoor UV radiation from the sun face special challenges. That's why we've created high-quality, five-layer composite piping systems specifically for outdoor installations. These pipes and fittings will hold up in the sun for decades with almost no maintenance or leakage. They are the perfect, durable solution for your outdoor water or irrigation systems.

GLOBAL RESIDENTIAL PROJECTS

CENTURY TRUMP TOWER

Makati City, Philippines

Product: Approx. 469,000 feet of POLOPLAST pipes and fittings

Construction period: 2012–2017

Rising in the Philippines' most prestigious financial and commercial district is a name synonymous with unparalleled service, quality, and real estate. Trump Tower at Century City—the country's most amenitized residential high-rise and Manila's newest landmark. The City of Makati, or "Modern Makati," is the undisputed financial, commercial, and social center of the Philippines.

CUTTING-EDGE HOTEL PROJECTS

AL HABTOOR CITY HOTEL

Dubai, United Arab Emirates

Product: Approx. 131,000 feet of POLOPLAST pipes and fittings

Construction period: 2012–2018

Habtoor Group built the largest integrated hotel complex in the Middle East, comprising a five-level podium, one 36-story tower, and one 25-story tower within a total GFA of 3,767,000 sq. feet.

POLOPLAST AUSTRIA

POLOPLAST AMERICA

PURE PROGRESS / poloplast

POLOPLAST America offers high-performance plastic pipe systems that comply with the highest market demands for quality and represent safety, reliability, longevity, recycling, sustainability, and first-class service. POLOPLAST America was founded in 2018, but our parent company spent the past 60 years perfecting our products with constantly improving technology. POLOPLAST is the piping system of choice for game-changing building projects in Europe, Asia, the Middle East, and around the world due to its durability, affordability, and ease of use.
