Buildings: 8

MEA Training Center Beirut is a flight-simulator training center near Beirut's airport. The company trains more than 120,000 pilots each year. MEA pilots will receive training at the highest level of proficiency with the best technology in the world. POLOPLAST, with its high-quality pipe system, is the ideal solution for this project.

POLOPLAST PIPING SYSTEMS

USE ANYWHERE IN NEW BUILDINGS, RENOVATIONS, AND REPAIR PROJECTS

Never stuck for a solution. High product quality. Complete product assortment. Straight-forward but extremely reliable and durable watertight joining technology. Low-weight and trouble-free. Time- and money-saving installation needing only a few light-weight tools. These are all things that make POLOPLAST a use-anywhere, eco-friendly, cost-efficient piping system. Whether you're building from scratch, renovating, or just doing a repair job, its flexibility is one of many water-tight arguments in this system's favor.

ADVANTAGES OF POLOPLAST

- Increased durability thanks to high-quality materials and manufacturing
- Heat-fused joints provide operational reliability
- Meets high hygienic requirements, thus ensuring pristine water quality
- High abrasion resistance means immaculate hygiene and safety
- Resistant to thermal expansion, meaning simple design and installation
- Highly chemically inert, which ensures long service life
- Smooth, non-porous I.D. of pipes prevent deposits and incrustation
- PP-R muffles the ambient noise generated by the flow of water that is notable with metal pipes
- The system's fusion-based joining process and low weight saves time and money when it is being installed
- The extensive range of different pipes and fittings provide a solution for all types of applications
